

How to order components:

We don't use an integral on-line shopping cart system.

You can place an order using the Order Form on the drop-down menu if you wish – this is really only to help organize your order.

All we require is the part number(s) and quantity(ies) and your shipping address. Email the form to us and we'll prepare a proforma invoice with the cost of the items, applicable taxes and the ship cost and return this to you. Once you approve the order we'll pull and pack it and email the tracking number.

You can also simply email a list of the required components and your shipping address and we'll proceed as above.

You can also call in an order. This isn't the best option for a large order of many different part numbers. Our toll-free number is available from within Canada only (1-877-303-9331). Local or international calls use 250-2-544-8880. If you receive our message system please leave a number and we'll promptly return your call.

We accept Interac e-Transfer, VISA and MasterCard payment.
